“Two Get Movin” Thought For the Week

Helmet how-tos

To make sure a bicycle helmet fits correctly, use the “eyes, ears, and mouth” test:

- **Eyes:** When you look up, you should see the bottom rim of the helmet. This should be one or two finger-widths above the eyebrows.
- **Ears:** The straps should form a V under the earlobes, and should be snug but comfortable.
- **Mouth:** When you open your mouth as wide as you can, you should feel the helmet hug your head. If not, tighten the straps. Source: Safe Kids World Wide
